TO See Distribution Below

The Environmental Services Division is in the process of disposing of wastes generated from recent sampling activities under the RCRA and Superfund/uncontrolled site programs. They have requested a list of sites or investigations which we have requested and need to retain duplicate samples and/or original samples for litigation or other purposes. If you provide the list of sites by name, ENSV will segregate the samples and hold them. All others will be discarded to alleviate the major storage problem which is developing.

In order for ENSV to be prepared to deliver wastes to the disposal contractor in early May, we need to provide this list to them by Friday, April 22. I have asked Chet McLaughlin to assist the disposal efforts and assure retention of the necessary samples. Please provide your list of cases/sites/investigations where samples need to be retained. ENSV is also changing some sample handling procedures to facilitate retention or disposal as the case may be.

Thank you for your assistance on this effort.

Subject: Disposal of Dioxin Containing & Waste Samples

To: Robert Morby, Chief, WMS

xx From: Kenneth S. Ritchey

In response to your April 20, 1983 memo, I have evalusted the sites sampled in Southwest Missouri and recommend the following:

Site or Area	Justification
Samples not for disposal: Spring River Basin Area:	
xxxx Samples not for disposal: Denney Farm Site and related off-site samples (water monitoring plan),	
Syntex Syntex facility: Trench, irrigation, burn, and lagoon areas, detoxification and spill area, Syntex slough area off site, Haddock Farm; Erwin Farm , Erwin Barn, Rusha Farm, Baldwin Park ; All fish and sediment samples etc from Spring River Basin.	On going negotiations and investigation of the site.
Out of Basin Barry County: Denney Farm site and related off-site samples (water monitoring plan)	Samples would be evidence in trial scheduled for July 25, 1983.
Samples <u>for</u> disposal: Bill Ray Farm Crider Farm Perry Mann Site McKee Site	Sites are not under investigation or litigation or remedial has been completed at these locations

7061493

The above sites and area are the one in South west Missouri that I work with. If you have questions or comments please let me know. I have discussed the above recommendation with Dan Shiel and requested that he coordinate this with ~~DOJ~~ DOJ.
